

Dear Madam/Sir,

I am submitting my resume for consideration for the summer application design internship program at Silicon Labs. Given the skills and experience outlined in my enclosed resume, I believe I will be a worthy asset to your team.

In my three years at Veer Surendra Sai University of Technology, I've completed a great deal of coursework on cutting-edge design trends and best practices including Machine Learning, Deep Learning, Robotics, Cloud Computing where I learned and applied skills such as Video Summary Generation, VirtualBox simulation, Holonomic motion with reverse kinetics, image processing.

In addition, I spent the past term volunteering my time with a local non-profit that collects donated clothes and redistributes it to families in need. I helped the web team update and re-launch an application that allows people in the community to locate nearby drop-off points and schedule pick-ups.

Volunteering with the non-profit has also taught me the importance of building a convenient and memorable consumer experience that aligns with the brand. It also helped me grow my skills in team collaboration, verbal communication and project leadership.

I believe I would make an excellent addition to your team. This internship would help me grow my real-world experience in the technology industry and help me further develop and refine my application design skills.

I look forward to hearing from you!

Sincerely,

Prateek Sarangi
